GOLDEN VISION METAL INDUSTRIES FACTORY

GOLDEN VISION METAL INDUSTRIES FACTORY

WHO WE ARE

A FACTORY BUILT AROUND PROJECT REQUIREMENTS

Golden Vision Metal Industries Factory (GVCO) is a Saudi factory located in the Third Industrial City in Jeddah, specializing in the manufacturing of metal parts and components according to drawings, technical specifications, and industrial project requirements. We bring together multiple capabilities within the factory, including CNC turning and milling, laser cutting, metal forming, welding, metal fabrication, and assembly, enabling us to perform multiple manufacturing stages within a single facility. We handle special parts, industrial spare parts, custom-manufactured components, and different quantities according to the nature and requirements of each project.

GVCO | We start with the project requirements and build the manufacturing process around them.

Official Facility & Licensing Information

Unified National Number: **7004339417**

Industrial License Number: **45228545**

Location: **Jeddah – Third Industrial City – Kingdom of Saudi Arabia**

WHO WE ARE

A FACTORY BUILT AROUND PROJECT REQUIREMENTS

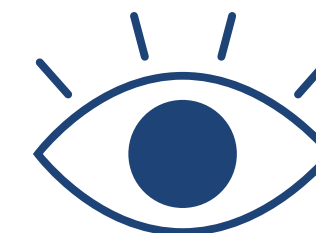

Our Mission

To be a trusted company in precision metal manufacturing and to provide advanced engineering and manufacturing solutions that meet the requirements of the local and regional markets.

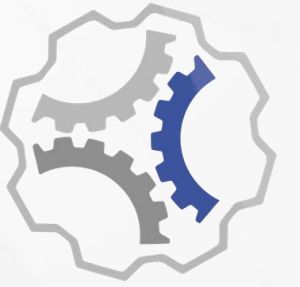

Our Vision

To provide high-quality and high-precision metal products and solutions based on commitment to customer requirements and approved professional standards.

OUR VALUES

A FACTORY BUILT AROUND PROJECT REQUIREMENTS

01

Quality

We are committed to quality standards throughout the various manufacturing stages.

02

Innovation

We seek practical solutions and suitable manufacturing technologies for every requirement.

03

Commitment

We are committed to agreed deadlines and requirements.

04

Safety

We strive to maintain a safe working environment and responsible operating practices.

05

Customer Satisfaction

We aim to build long-term relationships based on trust and performance.

MANUFACTURING CAPABILITIES

MULTIPLE CAPABILITIES WITHIN ONE FACTORY

Heavy-Duty Faceplate Lathe

Machine Type: Heavy-Duty Faceplate Lathe

Classification: Heavy-Duty Turning Machine

Operating System: Conventional / Manual Turning

Manufacturer: Unconfirmed

Model: Not visible in the image

Maximum Turning Diameter: Requires confirmation

Maximum Turning Length: Requires confirmation

Description:

A heavy-duty lathe designed for machining large-sized metal components. It enables turning, boring, and face-machining operations for heavy parts according to engineering drawings and technical specifications.

CNC Turning

MULTIPLE CAPABILITIES WITHIN ONE FACTORY

Manufacturing to Drawing

We manufacture parts and components based on project drawings and technical specifications.

Flexible Production Types

We handle individual parts, custom work, and different production quantities based on project requirements.

Local Manufacturing

Key manufacturing processes are carried out at our facility in Jeddah, Saudi Arabia.

Multiple In-House Processes

A project may combine turning, milling, laser cutting, forming, welding, and assembly according to product requirements.

Multiple Materials

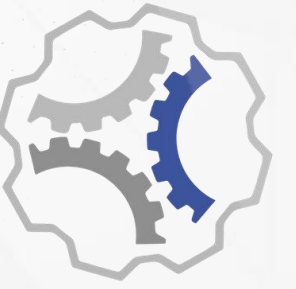

Materials handled according to project requirements include: Carbon Steel | Stainless Steel | Aluminum | Brass | Copper | Engineering Plastics.

Made-to-Order Projects

We handle non-standard components and projects that require evaluating the appropriate manufacturing method rather than relying on ready-made products.

SELECTED WORKS

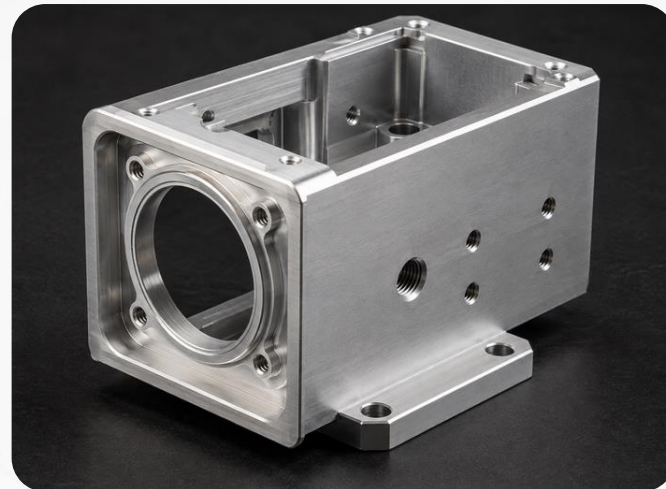

MANUFACTURING CAPABILITY IS
REFLECTED IN THE PRODUCT

The work carried out within GVCO reflects the diversity of the factory's processes and its ability to handle parts and components that vary in size, shape, material, and manufacturing method.

Work 1 — Precision CNC Milling

Process: CNC Milling
Material:
Dimensions:
Tolerance:
Finish:

Work 2 — CNC Turning

Process: CNC Turning
Material: [Material]
Diameter: [XXXX mm]
Length: [XXXX mm]

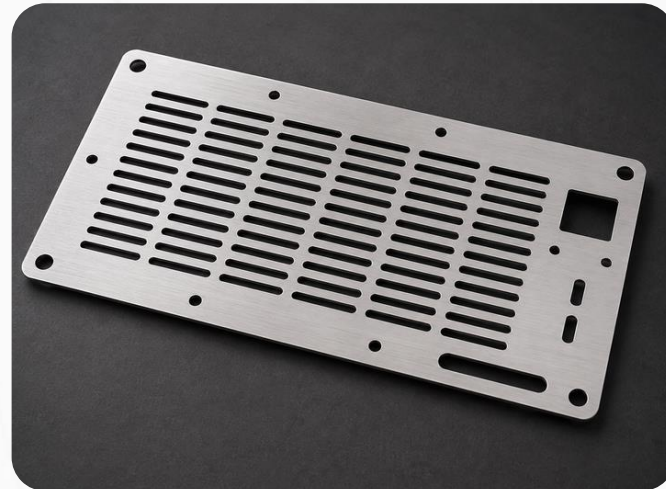

Work 3 — Large-Diameter Turning

Process: Turning + Boring
Material: [Material]
Diameter: [XXXX mm]
Length: [XXXX mm]

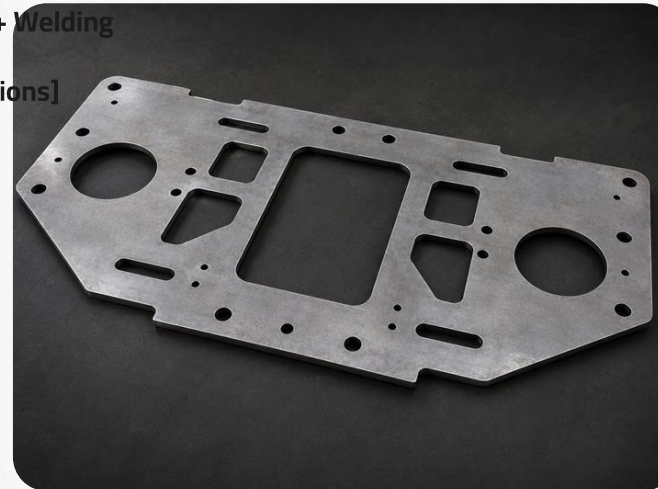

Work 4 — Laser-Cut Component

Process: Laser
Cutting
Material: [Material]
Thickness: [XX mm]
Dimensions:
